in Görkem Berk Gündoğdu

UI-focused designer creating digital products, responsive websites, and functional interfaces. I combine visual design, product thinking, front-end knowledge, and AI-assisted workflows to move ideas from early concepts to usable experiences. My work includes designing product screens and user flows from scratch, building web experiences, and collaborating with technical teams. My long-term focus is on interactive, AI-native products across digital platforms and games.

Work Experience

UI/UX Designer

Operator.io

Jan 2026 -

- Designed finalized product interfaces and user flows from scratch based on product briefs and technical requirements.
- Established visual direction and interface patterns for the product without relying on an existing design system.
- Used AI-assisted workflows for ideation, interface exploration, UX problem-solving, and development collaboration.

Co-Founder

v1be.io

July 2026 -

- Contributed to early product direction and positioning as part of the founding team.
- Designed and launched two landing pages to communicate the product vision and support early validation.
- Began shaping the core product interface and visual direction.

Freelance Web Designer & Developer

(July 2025 - Present)

Web Designer&Developer (E-commerce)

Rook AI July 2025 - Oct 2025

MyNessa Media Jan 2026 - Apr 2026

- Design and develop responsive websites for startup and client projects based on e-commerce
